Enter the world of WIŚNIEWSKI doors

Doors which combine only
the best qualities.

Each time a WIŚNIEWSKI door is crafted, we focus on design, modern trends, and style that draws the eye. But we put just as much effort into what cannot be seen at first glance: construction and production technology. This approach guarantees that your door will look perfect and at the same time provide security, safety, warmth, as well as peace and quiet for many years to come. We have been manufacturing doors for three decades, which taught us how to combine technology, design and customization with your comfort, convenience, and care for your family.

Aluminium doors, but what does it mean?

Class: **luxury**

Aluminium resists corrosion, it is durable and at the same time also considerably lighter than steel, which makes it a perfect material for building home joinery. Aluminium makes it possible to ensure excellent thermal insulation parameters, which has an impact – among other things – on your heating bills.

10

year **warranty**

A warm and sound-insulating leaf
with solutions for the best durability

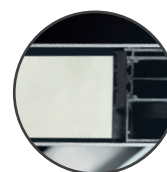

Three-point automatic lock – ensures security

Certified anti-burglary lock cylinder
– security backed up by convenience of use

Convenient opening systems – also in a version without a key

Set of 5 permanent and 2 temporary keys
as standard!
(ask a sales rep)

Threshold with a thermal break and thermal widening – for a perfect and warm installation

Compensation mats – for additional sound insulation and preventing deflection

Sealed so well that they can be fitted **in areas without a roof**

Opening frame and leaf provide proper **thermal insulation and durability**

Safe **four-glass unit**

Roller or concealed **hinges** – aesthetics and reliability

Energy **efficiency**

Opening **without a key**

CREO means possibilities to create your own space: beautiful, safe, and comfortable. We give you our perfect design that you can complement yourself with colour, accessories, and details.

How to CRE(O)ate your door model?
Scan the code and see for yourself!

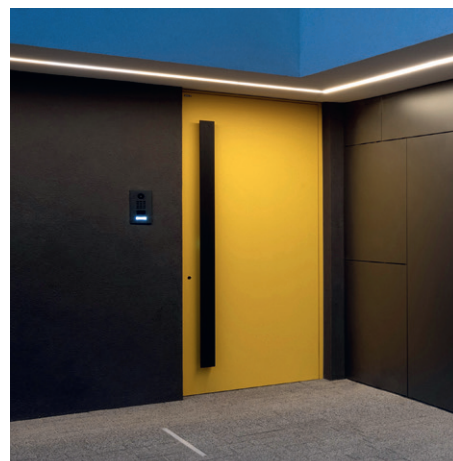

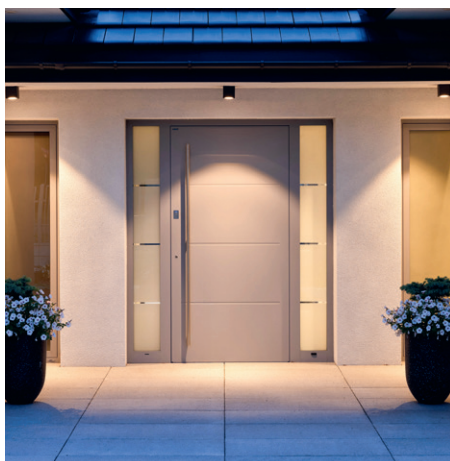

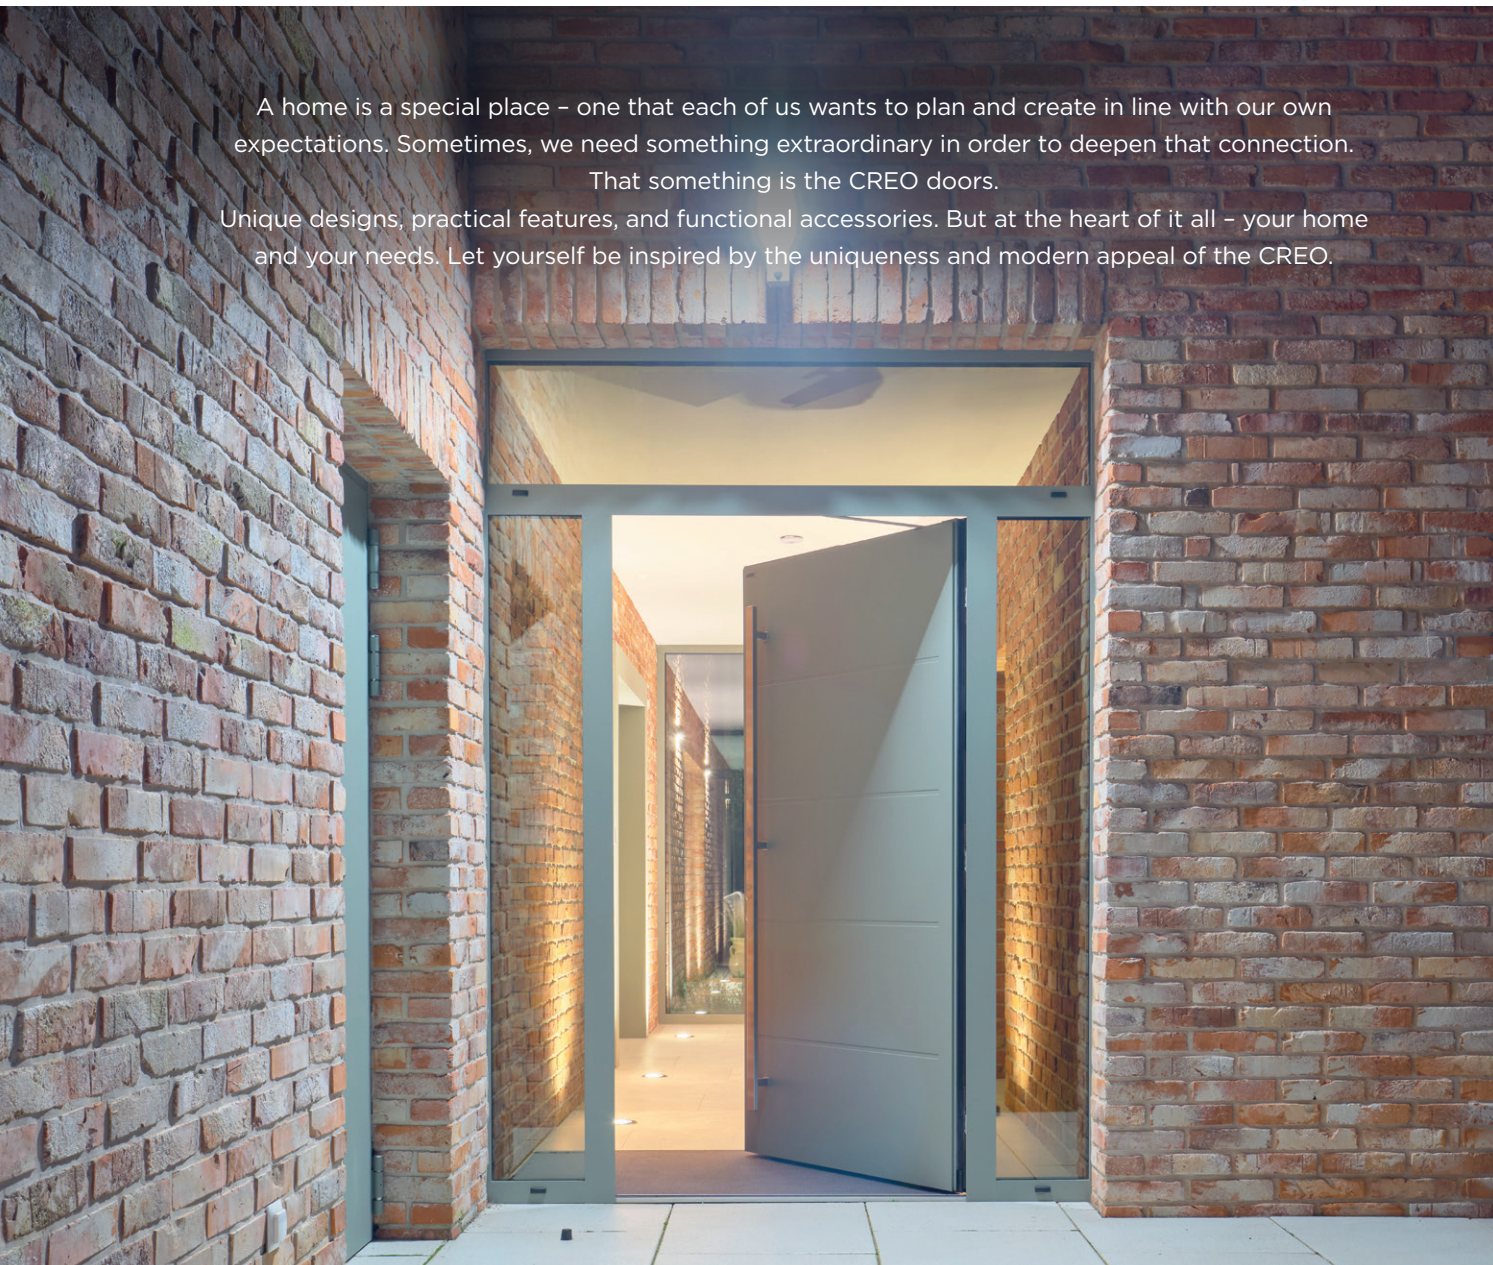

CREO. Something exceptional

A home is a special place – one that each of us wants to plan and create in line with our own expectations. Sometimes, we need something extraordinary in order to deepen that connection.

That something is the CREO doors.

Unique designs, practical features, and functional accessories. But at the heart of it all – your home and your needs. Let yourself be inspired by the uniqueness and modern appeal of the CREO.

Exceptional textures

Experience the beauty of the CREO doors not only with your eyes, but also through touch. The 800 line features doors finished with sintered quartz – offering a unique texture and stunning natural tones. This technology ensures that no two CREO 800 doors are ever the same.

Exceptional style

In the 500 line, wood takes the centre stage – but in a form that’s hard to find elsewhere. An unconventional layout, modern lines, and a colour palette that spans the most beautiful shades of brown.

An exceptional solution

Concealed pulls have been a major trend in recent seasons. We appreciate design innovations that are also practical. Do you like functional trends? Choose a CREO door from the 700 line.

CREO 300 Exceptional freedom

Don't like limitations? Model 300 is the embodiment of freedom. Work with our specialists to create your own door design – tailored to the unique character of your home.

NOVA

A collection of external aluminium-and-steel doors, whose elements have been selected to create a complete design for your home. The aluminium opening frame is warm and durable, the steel leaf ensures security, and perfectly insulates from noise, cold, and moisture.

NOVA. From retro to trendy

They say choice is what we love most. Exploring possibilities and options brings joy and helps us better imagine our future home. The NOVA door collection offers designs inspired by retro style, timeless classics, and modern forms aligned with recent trends.

All of this is divided into several distinct lines – so you can enjoy the search and ultimately find the one that's just right for you.

Noticeably different NOVA U Line

A concealed long pull is more than just a curiosity. It retains all the practical advantages of a traditional pull – and just look at it! The U Line also comes with **SMART solutions as standard**. The WIŚNIEWSKI Connected version allows you to manage your NOVA door using our dedicated app.

A detail that changes everything NOVA L Line

Louvres are an accent we've truly fallen for. They add subtle depth to classic designs – and can also serve as a unifying motif throughout a number of elements of the home's décor.

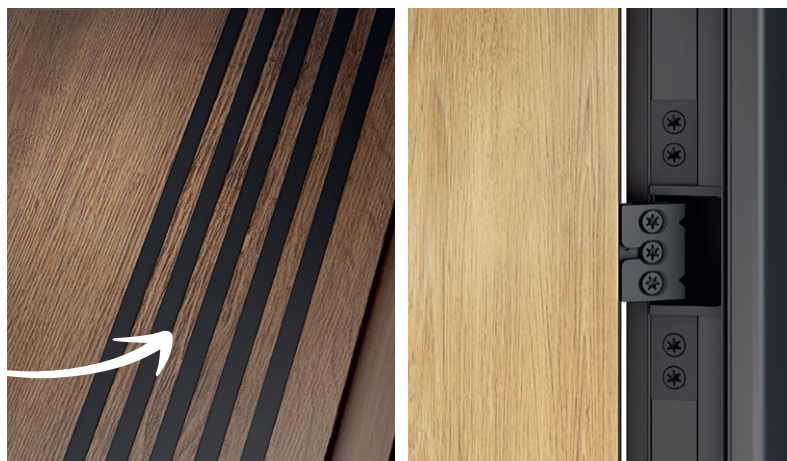

Classic, reimagined NOVA Retro Line

Retro-inspired design paired with state-of-the-art performance parameters. A perfect fit not only for renovated buildings, but also for new ones whose owners appreciate timeless design.

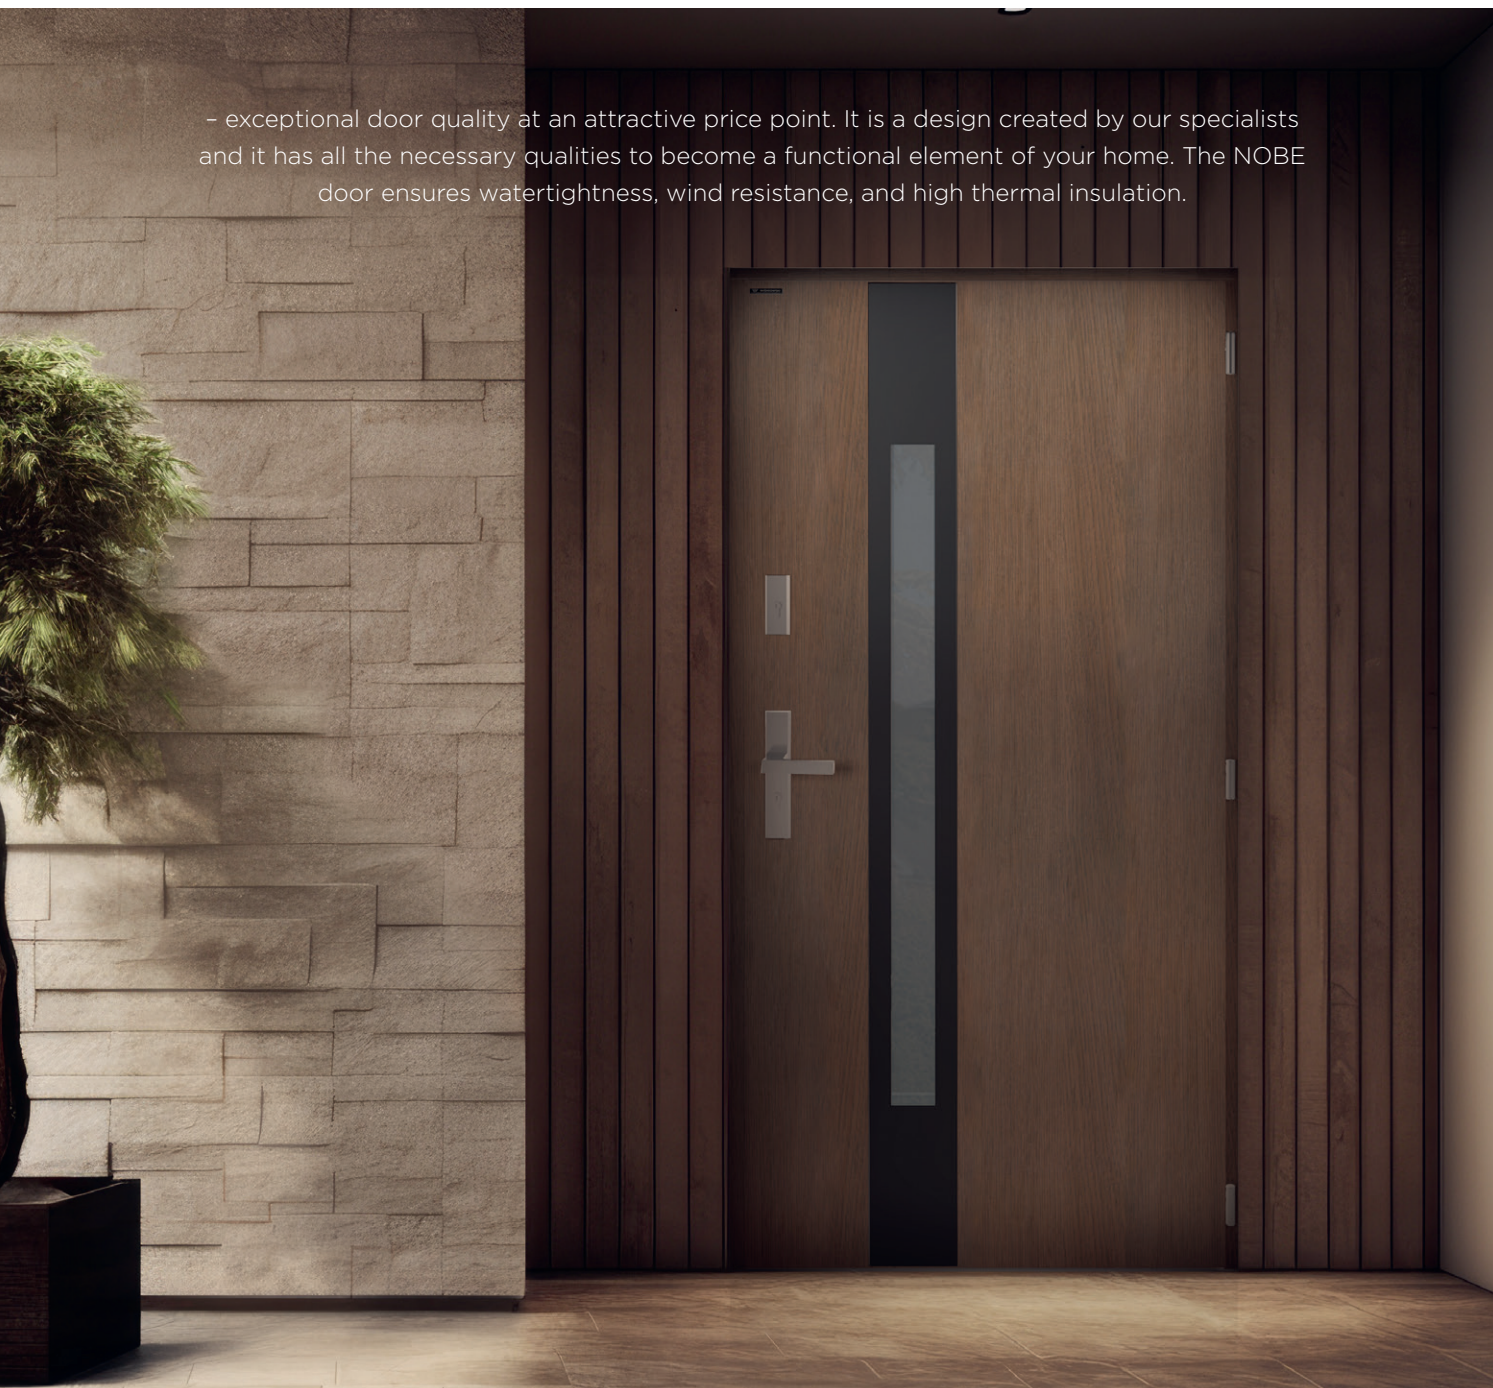

What counts is... every **detail!**

Every detail matters – and in the case of the NOVA doors, this principle is the foundation of their **quality, safety, and aesthetics**. The decorative motifs of the NOVA doors are crafted to impress both from afar and up close.

NOBE

- exceptional door quality at an attractive price point. It is a design created by our specialists and it has all the necessary qualities to become a functional element of your home. The NOBE door ensures watertightness, wind resistance, and high thermal insulation.

WIŚNIEWSKI Connected

– available with the NOVA U Line doors

Discover the possibilities of a SMART home with WIŚNIEWSKI!

Control your garage door, roller shutters, entrance door, and gate, manage access, and monitor security – all in one app. No central control unit, no remote, no cables – just one click! **Experience freedom with WIŚNIEWSKI Connected!**

Day latch function – full control via the app

Take the functionality of the NOVA U Line doors with a concealed pull to the next level. Activate and deactivate the day latch function with a single click. The built-in Wi-Fi module connects to your home network without the need for additional devices such as a gateway.

With the day latch function and the WIŚNIEWSKI Connected app, you can create practical scenarios:

- time-based (open and close at specific hours),
- recurring (regular open and close cycles),
- access management through permission sharing,
- receive real-time status updates (door open/closed).

Pull backlight – style and convenience

Choose your perfect lighting! Available in neutral white or the full RGBW colour palette. A practical feature that gives the NOVA door a truly unique character.

You can switch the lighting on and off freely or set personalized scenarios:

- time-based (from – to within a chosen time frame),
- recurring (regular on/off cycles),
- dependent on the time of day (dawn/dusk) with optional time adjustment,
- access management through permission sharing.

Comfort and safety every day

Day latch function

Doors with a pull have become a trend in the recent years. With the **day latch function**, you can use them comfortably and safely. Use it to your convenience: switch the function on or off with one button. Forget about the key without compromising security and convenience.

Day latch function buttons for the NOVA and CREO doors
- internal and external

*available in a black/inox version

OneGO – a reader that will transform your door!

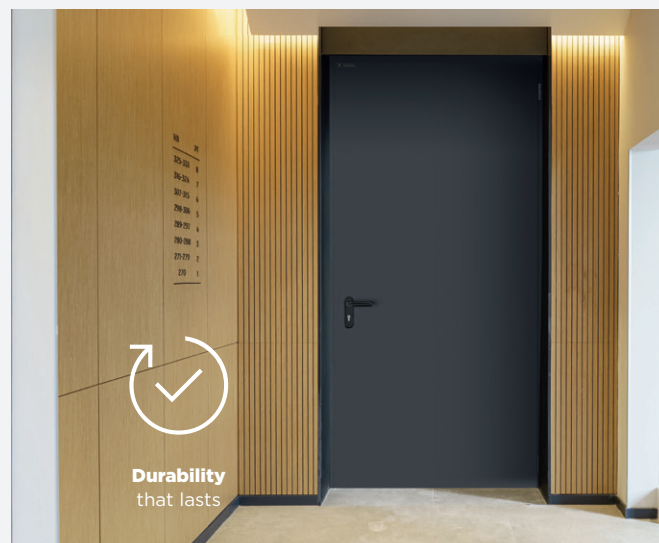

3 OPENING METHODS

-   
-  Temperature resistant
-  IP66 waterproof
-  Easier access without compromising security
-  You do not need carry the home key with you
-  You benefit from all the advantages of a door with a long pull

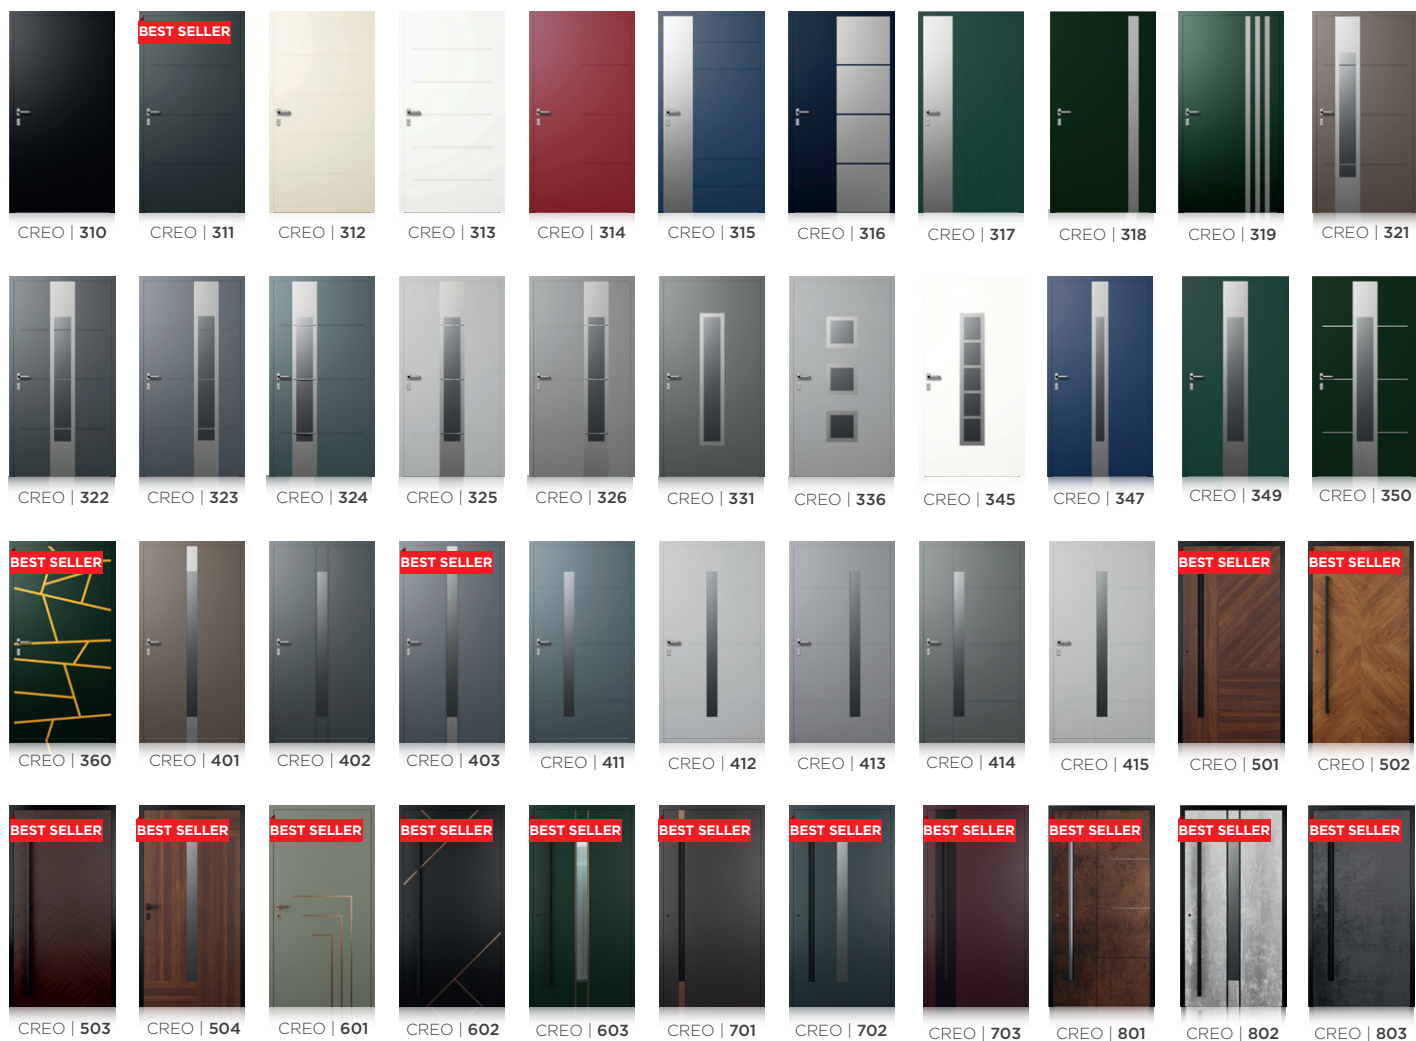

ECO. Steel technical doors

Minimalist design and versatility are the pillars of the ECO door series. It is a perfect door for connecting your home and the garage. It also works great in boiler rooms, as entrances to pantries and all kinds of technical rooms – not only in your house! It is also a perfect choice for utility buildings.

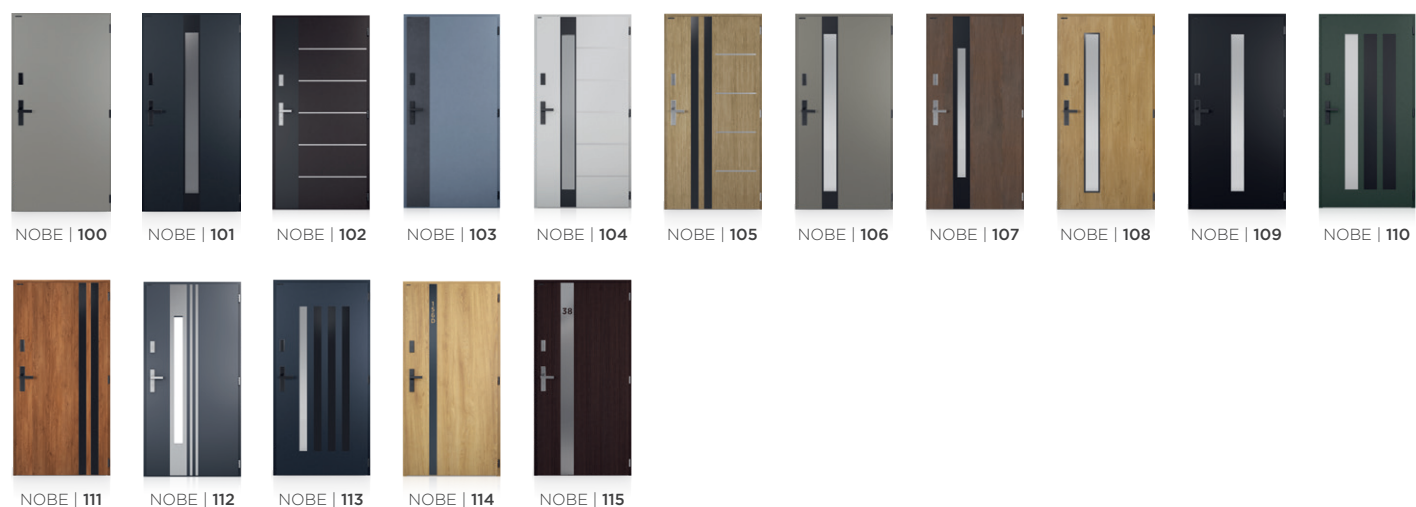

Seamless steel doors are a perfect solution for boiler rooms and basements, for example. They also work well as a second garage door entrance and as an entrance to any room that needs proper security combined with a high convenience of use. The leaf is made of galvanized sheet 0.5 to 1.5 mm thick, with polyester coating or powder coating. Its sturdy structure makes it possible to install the ECO door both inside and outside rooms.
